EDUCATION

Information System

University of Information and Technology

09/2019 - Present

Thu Duc City, Vietnam

Fundamental Courses:

- Object-Oriented Programming
- Data Structure and Algorithms
- Database Management System
- Information System Analysis and Design

PERSONAL PROJECTS

My Resume (04/2023 - Present)

- **Description:** The project is typically a personal website written in Visual Studio Code that showcases the skills, experience, and summary of an individual job seeker, which is me.
- **Technologies:** Python, Django framework, SQLite.
- **Github:** <https://github.com/nhanna1219/Resume.git>

CareMinder (04/2023 - Present)

- **Description:** Careminder is a health and wellness mobile app designed and implemented in Android Studio, helps users manage their overall health. Users can track their progress towards health goals, such as weight loss or exercise targets, using the app's tracking features.
- **Technologies:** Java, XML, Firebase.
- **Github:** https://github.com/nhanna1219/Care_Minder.git

RoboTech (11/2022 - 01/2023)

- **Description:** Robotech is a PC-selling website that was built using .NET. Both the user side and the admin side are included in this project. Customers have the option to shop or view their past purchases. The administrator can control all orders and users, making it easier to generate income.
- **Technologies:** C#, .NET, SQL Server Management Studio.
- **Github:** <https://github.com/nhanna1219/RoboTech.git>

Nikca (12/2022 - 01/2023)

- **Description:** Nikca is a website for buying and selling cameras, which was created with the goal of understanding more about .NET. Additionally, it contains two actors: a user and an administrator, each with their own site. Users are able to manage their orders and take any other necessary steps. Admins may control user orders and the store's revenue.
- **Technologies:** C#, .NET, SQL Server Management Studio.
- **Github:** <https://github.com/nhanna1219/NikCa.git>

ACHIEVEMENTS

Leadership

By repeatedly leading teams, I have developed my leadership skills. Expressed through abilities to define and evaluate objectives and progress. From there, I could set clear goals and develop a plan for my collaborators effectively.

Self-learning and discovery

I was compelled to learn other coding languages and frameworks on my own in order to keep up with my peers due to the rapidly evolving nature of technology. Hence, my development has improved and also enhanced my ability to accomplish the jobs.

Time Management

In college, I had to meet strict deadlines for a significant number of tasks that had been handed in with little notice. As a result, I developed better time management skills and increased my productivity.
